

Elevate your operations. Seamless support, expertly managed.

Connect360 managed services offer a dynamic duo of solutions designed to ensure your cloud infrastructure not only responds effectively when issues arise but also proactively enhances your systems to prevent problems before they impact your operations. Our services are founded on ITIL principles, but what we deliver goes beyond standard practices — we provide a cutting-edge, comprehensive safety net for your platforms.

Two-tiered excellence: Support and Manage.

1 Support

Responsive, reliable, ready.

When challenges surface, time is of the essence. Our Support service acts as your dedicated technology specialist, standing by to address issues swiftly and with precision. This responsive service guarantees that disruptions are swiftly managed, minimising downtime and preserving seamless customer experiences. It's about providing peace of mind, knowing that expert help is just a call away, ready to restore functionality and navigate any emergency.

2 Manage

Proactive, preventative, proficient.

Why leave your cloud architecture to chance? Our Manage service takes a proactive approach towards your cloud environment. Through ongoing monitoring and management, we foresee potential challenges and apply remedies before they jeopardise your operations. This service aims to optimise your workflows, elevate system efficiency, and fortify your platforms against impending risks. With Connect360 Manage, your cloud infrastructure doesn't just survive – it thrives.

Choose Connect360 managed services for unmatched value and effortless solutions.

Unparalleled expertise.

Our teams are composed of seasoned professionals, well-versed in both reactive and proactive cloud management and support.

Adaptability.

Our services are tailored to fit your unique business needs, ensuring that your infrastructure aligns perfectly with your business goals.

Security.

We prioritise the safety of your systems with advanced security protocols, safeguarding your data and customer information.

ITIL-based, client-focused.

While our services are grounded in ITIL best practices for service management, our focus extends far beyond. At Connect, we leverage standardised methodologies into innovative solutions tailored to enhance your business operations and customer experiences. We're not just about keeping the lights on; we're here to ensure that your lights are the brightest and most efficient in your industry.

Our commitment to you.

We understand that our success is measured by your success. Our managed services are designed to function as an extension of your team, providing expertise, innovation, and unwavering support. We are committed to empowering your business with the tools and services you need to excel in a competitive marketplace.
